

Item 12

Notice of Motion

Review of 70 O'Connor Bus Route

Moved by: **Commissioner** Bradford

Seconded by: **Commissioner** McKelvie

Summary

The 70 O'Connor bus route operates between Coxwell Station and Warden Station on Line 2 Bloor-Danforth, and between Coxwell Station and the area of Eglinton Avenue East and Pharmacy Avenue, generally in an east-west direction.

In a recent analysis by a local transit expert, serious issues with wait times and bunching on the route were uncovered. The analysis points out that 70 O'Connor has not gone through the process of "reliability improvement" seen on many other routes, which could contribute to problems.

In order to improve the reliability of this route, I would like staff to review it for reliability improvements.

Recommendation

That the Board direct staff to investigate and report back by Q1/2020 on the 70 O'Connor bus route reliability, in response to Steve Munro's published analysis on his website stevemunro.ca on November 20, 2019.

Date: December 3, 2019
