

## STAFF REPORT ACTION REQUIRED

### More Off-Peak Service: Expansion of All-Day, Every-Day Network

<b>Date:</b>	May 27, 2015
<b>To:</b>	TTC Board
<b>From:</b>	Chief Executive Officer

### Summary

---

This report recommends new and restored periods of off-peak service on bus routes, so that more TTC routes operate all day, every day, making transit an available, predictable, and consistent travel option for everyone.

This report is a follow-up to the August 19, 2014 report, *Opportunities to Improve Transit Service in Toronto*, which was approved by the TTC Board, and subsequently funded by City Council as part of the 2015 City Budget.

Additional off-peak periods of operation will be introduced during 122 operating periods on 43 bus routes. Most of the service improvements are the restoration of periods of service that were cut in May 2011. Twenty of the 122 service improvements, on five routes, are new periods of operation that have never been operated before.

It is recommended that the Board approve the recommendations in this report. If approved, the service changes would be implemented starting from September 6, 2015. As with all routing or network changes, these changes would be evaluated after a minimum of six months of non-summer operation, and a report on the post-implementation review would be submitted to the Board.

### Recommendations

---

#### It is recommended that the Board:

1. approve the recommendations in this report, as summarised in Appendix A, to operate additional periods of service on the specified TTC bus routes, effective from September 6, 2015; and
2. forward this report to the City of Toronto's City Clerk for re-direction, as appropriate.

## Financial Impact

This service initiative was included in the 2015 TTC Operating Budget, which was approved by City Council on March 11, 2015.

Funding in the amount of \$1.7 million is included in the TTC's 2015 operating budget to operate this expanded service from September to December, 2015. This would be partially offset by an increase in fare revenue in 2015 of up to \$700,000. The improvements will increase operating costs by approximately \$5.5 million annually, which will be partially offset by an annual increase in fare revenue of \$2.0 million.

The Chief Financial & Administration Officer has reviewed this report and agrees with the financial impact information.

## Decision History

At its August 19, 2014 meeting, the TTC Board adopted the report, *Opportunities to Improve Transit Service in Toronto*. Among the recommendations was an increase in service on many bus routes so that they would operate during more periods of the week, providing all-day every-day service.

[http://www.ttc.ca/About\\_the\\_TTC/Commission\\_reports\\_and\\_information/Commission\\_meetings/2014/August\\_19/Supplementary\\_Reports/Opportunities\\_to\\_Improve\\_Transit\\_Service\\_in\\_Toronto.pdf](http://www.ttc.ca/About_the_TTC/Commission_reports_and_information/Commission_meetings/2014/August_19/Supplementary_Reports/Opportunities_to_Improve_Transit_Service_in_Toronto.pdf)

On March 11, 2015, Toronto City Council passed the 2015 City Budget, which confirmed funding for this initiative, among others.

## Issue Background

### *All-Day, Every-Day Service*

Off-peak service on many bus routes was cut-back or eliminated in 2011 as a result of City budget pressures. This resulted in residents in many neighbourhoods in Toronto being denied the opportunity to use transit when travelling at times like evenings and weekends. These services should be restored so that most bus and streetcar routes operate all day, every day, from approximately 6:00 a.m. (9:00 a.m. on Sundays) to 1:00 a.m. This would make it convenient and viable for all residents to count on transit at any time of the day or night for their travel needs. It would change people's decision-making about how to travel -- by transit instead of cars -- and allow them to be confident that transit will always be there when they need it. This service improvement would support several City initiatives such as the *Official Plan* which encourages Torontonians to travel by means other than cars, in order to reduce pollution and congestion from low-occupancy

private automobiles. This service improvement also aligns with the City's Poverty Reduction Strategy, which advocates for more access to transit at all hours of the week.

## **Accessibility Issues**

All TTC bus services are operated using accessible, low-floor buses, and as such, all of the new services recommended in this report will be accessible. Overall, adding more all-day, every-day service improves the provision of accessible services in Toronto.

## **Comments**

Additional periods of operation are recommended to be introduced during 122 operating periods on 43 bus routes, starting from September 6, 2015. These are listed in detail in Appendix A, and are shown on the map on the next page. These service improvements will add new periods of operation on these bus routes, so that, in most cases, the routes operate all day, every day. "All day, every day" means service is provided from approximately 6:00 a.m. to 1:00 a.m. from Monday to Saturday, and from approximately 9:00 a.m. to 1:00 a.m. on Sundays.

Most of the service improvements are the restoration of periods of service that were cut in May 2011 in response to the City's cost-reduction directive. Twenty of the 122 service improvements, on five routes, are new periods of operation that have never been operated before.

Of the 43 routes with service improvements, 34 routes will now have service operating all day, every day. The remaining nine routes will gain additional periods of operation, but will continue to not operate at all times, typically during the evenings on weekends, when projected ridership is low. With these changes, 133 of the TTC's 144 regular bus routes will operate all day, every day.

The exact implementation dates this fall of each service change have not yet been determined, because the introduction of the new schedules will be co-ordinated with the many other budgeted service improvements planned for the fall of 2015, such as new overnight services, additional off-peak service on busy bus and streetcar routes to reduce crowding and shorten waiting times, and service increases so that key routes operate every 10 minutes or better at all times.

Service improvements on two routes -- 28 BAYVIEW SOUTH and 101 DOWNSVIEW PARK - cannot begin until later in 2016, because they require additional peak buses.

Approximately 1.3-million customer-trips would be made each year on the recommended new services. Many of these trips would be new to the TTC and would be attracted by the new service. Approximately \$2.0-million of additional fare revenue each year would be attributable to the customer-trips which would be attracted to the new services.

# Additional All-Day, Every-Day Service

— new or restored off-peak service

## Methodology and Service Standards

There is sufficient funding in the TTC's 2015 budget to re-introduce most, but not all, of the periods of service that were cut in 2011. In order to determine which services should be restored, projections were done of the boardings in 2015 on all periods of service that are not currently operated. Each period of operation was then ranked by the productivity measure of number of boardings per service hour. There is sufficient funding to operate all the services that are projected to have nine or more boardings per service hour and, as such, this becomes the threshold for determining which services the TTC can afford to restore and operate.

Additionally, ten routes have only one period of operation -- the late evening on Sunday and holidays -- that falls below the threshold of nine boardings per service hour, while all other periods exceed the threshold. It is recommended that these routes be operated at all times, as the additional cost of three hours of operation on Sunday evenings is small, and is outweighed by the benefits of consistency and having these routes included as part of the network of all-day, every-day services.

There are 42 periods of operation on ten routes that were eliminated in 2011, that are not recommended for reintroduction in 2015. Ridership on these services is relatively low, and their boardings per service hour are below the aforementioned threshold of nine boardings per service hour. These are listed in Appendix C. The cost of operating these not-recommended services would be approximately \$3.1-million per year, which would be offset by up to \$300,000 of additional fare revenue per year.

The use of the productivity standard of boardings per service hour, commonly used throughout the transit industry, began in 2011 at the TTC. It was first used to identify the services that were recommended for removal as part of the budget cuts in that year. The standard used at that time was 15 boardings per service hour or, in some cases where there was a long walk to alternate service, the standard was reduced to ten boardings per service hour. For 2015, the boardings per service hour standard has been continued, but at the lower, currently-affordable level of nine boardings per service hour. The calculation of boardings has also been simplified, and now counts all customers on the entire route or branch section, as appropriate. Previously, a more-detailed and labour-intensive evaluation was used to try to separate and weight differently the boardings that would be made at unique stops, at stops with intersecting routes, and at stops along common sections of multiple routes. The new, simplified method of counting substantially all passengers is simpler to apply and understand, and allows the threshold level to be lowered.

As with all route and network changes, TTC staff will conduct a post-implementation review on all the recommendations contained in this report. Every new service that the TTC introduces is initially operated on a trial basis. After a minimum six-month trial period, when ridership on the services has approached a mature state, passenger counts are taken, the performance of the route is reviewed, and a recommendation is made regarding its future. All service changes are reviewed to ensure that the original objective

of better service for customers has been met. The overall review also considers comments that have been received from customers and the community, and the experience that has been gained in operating the service.

A service change, which has met its performance objectives, will be recommended to be made a regular part of the TTC system. If a service change has been unsuccessful in some way, then a recommendation is made either to make further changes for another trial period or, to remove the service. The compulsory post-implementation review of every trial service change ensures that the success or failure of every service change is assessed consistently and fairly, and that there is full-accountability to the Board on matters which affect the service provided to customers.

### Communications Plan

In order to promote the new all-day, every-day services and, attract riders to the improved services, the TTC will develop communications initiatives, using various tactics and channels as appropriate.

## **CONCLUSION**

Off-peak service on many bus routes was cut-back or eliminated in 2011. These should be restored so that most TTC bus and streetcar routes operate all day, every day. This will make transit service in neighbourhoods throughout Toronto more convenient for travel at all hours of the week.

Appendix A: Recommended Additional Periods of Service

Appendix B: Details of Recommended Services

Appendix C: Services Not Recommended

## **Appendix A: Recommended Additional Periods of Service**

### **5 AVENUE RD**

Service will be restored in the late evening from Monday to Friday, and in the evening on Saturday, Sunday, and holidays. With this change, service on this route will operate all day, every day.

### **6 BAY**

Service will be restored in the late evening on Sunday and holidays. With this change, service on this route will operate all day, every day.

### **8 BROADVIEW**

Service will be restored in the late evening on Saturday, Sunday, and holidays. With this change, service on this route will operate all day, every day.

### **9 BELLAMY**

Service will be restored in the late evening from Monday to Saturday, and in the evening on Sunday and holidays. With this change, service on this route will operate all day, every day.

### **14 GLENCAIRN**

Service will be restored in the late evening, seven days a week. With this change, service on this route will operate all day, every day.

### **15 EVANS**

Service will be restored in the late evening on Sunday and holidays. With this change, service on this route will operate all day, every day.

### **20 CLIFFSIDE**

Service will be restored in the late evening on Saturday, Sunday, and holidays. With this change, service on this route will operate all day, every day.

### **26 DUPONT**

Service will be restored in the late evening, seven days a week. With this change, service on this route will operate all day, every day.

### **28 BAYVIEW SOUTH**

New service will be operated all day from Monday to Friday, and in the evening on Saturday, Sunday, and holidays. With this change, service on this route will operate all day, every day. Because this change requires two additional buses in the peak periods, it will be implemented in mid-2016, once additional buses are available.

### **30 LAMBTON**

Service will be restored in the late evening on Sunday and holidays. With this change, service on this route will operate all day, every day.

**32D EGLINTON WEST**

Service will be restored on the 32D (Eglinton West Stn-Jane & Emmett) branch in the late evening from Monday to Saturday, and in the evening on Sunday and holidays. With this change, service on this branch will operate all day, every day.

**33 FOREST HILL**

Service will be restored in the evening from Monday to Friday, and all day on Saturday, Sunday, and holidays. With this change, service on this route will operate all day, every day.

**39B FINCH EAST**

New service will be operated on the 39B (Finch Stn-Old Finch) branch in the midday and evening from Monday to Friday, and in the daytime and early evening on Saturday, Sunday, and holidays.

**42A CUMMER**

Service will be restored on the 42A (Finch Stn-Middlefield) branch in the late evening from Monday to Friday, in the daytime and early evening on Saturday, and in the daytime on Sunday and holidays.

**43B KENNEDY**

Service will be restored on the 43B (Kennedy Stn-Scarborough Centre Stn via Progress) branch in the daytime and early evening on Sunday and holidays.

**51 LESLIE**

Service will be restored in the late evening on Sunday and holidays. With this change, service on this route will operate all day, every day.

**56 LEASIDE**

Service will be restored in the late evening from Monday to Friday, and in the evening on Saturday, Sunday, and holidays. With this change, service on this route will operate all day, every day.

**59 MAPLE LEAF**

Service will be restored in the late evening on Sunday and holidays. With this change, service on this route will operate all day, every day.

**61 AVENUE RD NORTH**

Service will be restored in the late evening on Sunday and holidays. With this change, service on this route will operate all day, every day.

**62 MORTIMER**

Service will be restored in the late evening on Saturday, Sunday, and holidays. With this change, service on this route will operate all day, every day.

**72C PAPE**

Service will be restored on the 72C (Pape Stn-Commissioners) branch in the evening on Sunday and holidays. With this change, service on this route south of Eastern Avenue will operate all day, every day.

**73B ROYAL YORK**

Service will be restored on the 73B (Royal York Stn-Eglinton & LaRose) branch in the evening, seven days a week. With this change, service on this branch will operate all day, every day.

**74 MT PLEASANT**

Service will be restored in the evening, seven days a week. With this change, service on this route will operate all day, every day.

**76B ROYAL YORK SOUTH**

Service will be restored on the 76B (Royal York Stn-Queensway & Grand Ave) branch in the daytime on Saturday, Sunday, and holidays.

**79B SCARLETT RD**

New service will be operated on the 79B (Runnymede Stn-Lawrence via St Clair) branch in the late evening from Monday to Friday, and in the early evening on Saturday.

**80B QUEENSWAY**

Service will be restored on the 80B (Humber Loop-Sherway) branch in the late evening on Saturday, Sunday, and holidays. With this change, service on this route west of Humber Loop will operate all day, every day.

**94 WELLESLEY**

Service will be restored west of Wellesley Station in the late evening on Sunday and holidays. With this change, service on the entire route from Castle Frank Station to Ossington Station will operate all day, every day.

**98 WILLOWDALE-SENLAC**

Service will be restored east of Sheppard-Yonge Station in the late evening on Saturday, Sunday, and holidays. With this change, service on the entire route, both east and west of Sheppard-Yonge Station, will operate all day, every day.

**100 FLEMINGDON PARK**

New service west of Don Mills Road will be operated in the late evening on Sunday and holidays. With this change, service on the entire route from Broadview Station to Eglinton Station will operate all day, every day.

**101 DOWNSVIEW PARK**

Service will be restored during the peak periods, midday and early evening from Monday to Friday outside the summer. Because this change requires an additional bus in the peak periods, it will be implemented in Fall 2016, once additional buses are available.

**103 MT PLEASANT NORTH**

Service will be restored in the late evening on Sunday and holidays. With this change, service on this route will operate all day, every day.

**105 DUFFERIN NORTH**

Service will be restored on the 105C (Downsview Stn-Steeles) branch in the late evening on Sunday and holidays. With this change, service on this route between Downsview Station and Steeles Avenue will operate all day, every day.

**112C WEST MALL**

Service will be restored on the 112C (Kipling Stn-Disco) branch in the early evening on Sunday and holidays.

**115 SILVER HILLS**

Service will be restored in the late evening, seven days a week. With this change, service on this route will operate all day, every day.

**120 CALVINGTON**

Service will be restored in the late evening, seven days a week. With this change, service on this route will operate all day, every day.

**124 SUNNYBROOK**

Service will be restored in the late evening on Sunday and holidays. With this change, service on this route will operate all day, every day.

**127 DAVENPORT**

Service will be restored in the late evening on Sunday and holidays. With this change, service on this route will operate all day, every day.

**132 MILNER**

Service will be restored in the late evening on Sunday and holidays. With this change, service on this route will operate all day, every day.

**135 GERRARD**

Service will be restored in the late evening on Saturday, and in the evening on Sunday and holidays. With this change, service on this route will operate all day, every day.

**162 LAWRENCE-DONWAY**

Service will be restored in the early evening from Monday to Friday, in the daytime and early evening on Saturday, and in the daytime on Sunday and holidays.

**167 PHARMACY NORTH**

Service will be restored in the evening from Monday to Friday, and in the early evening on Saturday.

**169 HUNTINGWOOD**

Service will be restored in the late evening from Monday to Friday, in the evening on Saturday, and in the daytime and evening on Sunday and holidays. With this change, service on this route will operate all day, every day.

**172 CHERRY STREET**

New service will be operated in the evening on Sunday and holidays, outside the summer. With this change, service on this route will operate all day, every day.
